“Praise him with the sounding of the trumpet,  
praise him with the harp and lyre, praise him with  
timbrel and dancing, praise him with the strings and  
pipe, praise him with the clash of cymbals,  
praise him with resounding cymbals.

Let everything that has breath  
praise the Lord.”

Pslam 150:3-6

## KEYS, CHORDS AND SPEED – IMPORTANT TIPS FOR MUSICIANS

This booklet includes “singable” chord charts for the songs we are using in Ruach.

Professional recordings are done by people ~~with~~ who typically have higher (and stronger) voices. The chords to those recordings get transcribed onto the internet BUT the keys are often unsuitable for most people. The other complicating factor is that “pop” worship songs often follow a trend where the singer (usually male) starts out really low and then sings an octave higher for dramatic effect later in the song. Again, most of us can’t do that. One further issue is that when you are standing and singing in a larger group with a strong backing band you are more comfortable singing higher.

For all the above reasons it is important that songs sung in church, especially in small groups, are pitched correctly to suit “most” people. So try to follow the keys in this booklet. If you need to lift the key slightly use a capo on the first or second fret.

Using singable keys instead of “popular” keys can make rehearsing to the original recording difficult. Ruach uses [worshipteam.com](http://worshipteam.com) which allows musicians to rehearse a song along with the recording in whatever key you are playing in. (Ask for access to this site).

Its important to remember that the first chord of the song is often not the key that the song is in. So if you are playing the first chord and trying to sing in tune you will find it hard. So try playing the chorus first before everyone starts to sing the verse. This will allow the “root” note to be firmly in place and you can then launch into the first chord of the song.

Printed beside the title of each song is the suggested tempo (BPM – beats per minute). There are plenty of tempo apps that you can download. Setting the app to the correct beat of the song will help you rehearse at the right speed. Many a good song gets ruined because it gets played too fast or too slow. Songs under 100 bpm will be slower, more contemplative. Its always good to have a mix – just don’t go slow, fast, slow, fast, slow, fast ☺ In fact, its often good to run 2 songs of the same bpm together to create more flow.

Not all the chords here will be correct. Guaranteed. So please pass on your corrections/comments to the editor. ALSO, if your group has favourites that aren’t in this booklet, let us know and we will add them to future versions.

\* Numbers are  
beats per minute

Even though I walk through the valley of the shadow of death,  
Your perfect love is casting out fear,  
And even when I'm caught in the middle of the storms of this life,  
I won't turn back, I know You are near.

Pre-chorus

And I will fear no evil, for my God is with me.  
And if my God is with me,  
Whom then shall I fear? Whom then shall I fear?

Chorus

Oh no, You never let go, through the calm and through the storm.  
Oh no, You never let go, in every high and every low.  
Oh no, You never let go, Lord, You never let go of me.  
[2nd time] Singin'... [repeat chorus]

Verse 2

I can see a light that is coming for the heart that holds on,  
A glorious light beyond all compare,  
And there will be an end to these troubles,  
But until that day comes,  
We'll live to know You here on the earth.
